

ALETH STRADEN

Wheel & Tire Cleaner (Concentrate)

DOCUMENT NO.	VERSION	SUPERSEDES	ISSUED	EMERGENCY (US)
SDS-AL-01	2.1	2.0	October 7, 2026	1-800-222-1222

Uncontrolled when printed — verify the current revision on the ALETH website or with ALETH Chemical Co. Composition disclosed at class level under trade-secret claim (29 CFR 1910.1200(j)). Hazard information fully disclosed.

1 IDENTIFICATION

Product identifier	ALETH STRADEN — Wheel & Tire Cleaner (Concentrate)
Other means of ID	STRADEN · SDS-AL-01
Recommended use	Automotive wheel and tire cleaning. Dilute per label before use.
Restrictions	Not for use on bare aluminium, uncoated magnesium, or damaged clear coat. Not for internal use.
Supplier	ALETH Chemical Co., Charlotte, NC, USA
Contact	Inquiries: via the ALETH website or the contact details on the product label
Emergency phone	US Poison Control: 1-800-222-1222

2 HAZARD(S) IDENTIFICATION

DANGER

GHS CLASSIFICATION OF THE MIXTURE

GHS05 ·
CORROSION

GHS07 ·
EXCLAMATION

GHS09 ·
ENVIRONMENT

H314 — Causes severe skin burns and eye damage

H318 — Causes serious eye damage

H290 — May be corrosive to metals

H302 — Harmful if swallowed

H317 — May cause an allergic skin reaction

H410 — Very toxic to aquatic life with long-lasting effects

HAZARD CLASS	CATEGORY	H-CODE	STATEMENT
Skin corrosion	1A	H314	Causes severe skin burns and eye damage
Serious eye damage	1	H318	Causes serious eye damage
Corrosive to metals	1	H290	May be corrosive to metals
Acute toxicity (oral)	4	H302	Harmful if swallowed
Skin sensitization	1	H317	May cause an allergic skin reaction
Aquatic hazard (chronic)	1	H410	Very toxic to aquatic life with long-lasting effects

Precautionary statements (summary)

- **P260** — Do not breathe dust/fumes/mist/spray
- **P280** — Wear protective gloves/eye protection/face shield
- **P301+P330+P331** — If swallowed: rinse mouth. Do NOT induce vomiting
- **P303+P361+P353** — If on skin: remove contaminated clothing, rinse skin with water
- **P305+P351+P338** — If in eyes: rinse cautiously with water for several minutes; remove contacts
- **P304+P340** — If inhaled: remove to fresh air, keep at rest
- **P273** — Avoid release to the environment

Other hazards: Strongly acidic (pH ≈ 0.3). Exothermic reaction if diluted incorrectly — ALWAYS add concentrate to water, never water to concentrate.

3 COMPOSITION / INFORMATION ON INGREDIENTS

COMPONENT	CAS NO.	WEIGHT %	GHS CLASSIFICATION
Proprietary blend of acids and corrosion inhibitors	Trade secret	40 – 65	Skin Corr. 1A, H314 · Met. Corr. 1, H290
Proprietary blend of surfactants and solvents	Trade secret	15 – 25	Eye Irrit. 2, H319 · Skin Sens. 1, H317 · Acute Tox. 4, H302 · Aquatic Chronic 1, H410
Water	7732-18-5	Balance	Not classified

Trade secret statement (OSHA 29 CFR 1910.1200(i)): The specific chemical identities and/or actual concentrations or actual concentration ranges of the proprietary components are being withheld as trade secrets under the US regulation 29 CFR 1910.1200(i). Concentration ranges above are intentionally broad. Hazard information is fully disclosed throughout this SDS. Component identities are disclosed to treating physicians and other persons designated by them as required by 29 CFR 1910.1200(i)(4).

4 FIRST-AID MEASURES

Inhalation	Move to fresh air. If breathing difficulty, get medical attention.
Skin contact	Remove contaminated clothing. Rinse skin with water 15+ minutes. Seek medical attention. Wash clothing before reuse.
Eye contact	Rinse cautiously with water 15+ minutes, lifting lids. Remove contacts after 5 minutes, continue rinsing. Seek immediate medical attention.
Ingestion	Rinse mouth. Do NOT induce vomiting (corrosive — re-contact burns). Drink water/milk if conscious. Immediate medical attention.
Most important symptoms	Corrosive burns to skin/eyes; throat pain if ingested; respiratory irritation.
Note to physician	Treat symptomatically for corrosive injury. For component identities in an emergency, contact ALETH Chemical Co. (disclosure to treating physicians per 29 CFR 1910.1200(i)(4)).

5 FIRE-FIGHTING MEASURES

- **Suitable extinguishing media:** Water fog, alcohol-resistant foam, dry chemical, CO₂.
- **Unsuitable:** None known — product is an aqueous solution.
- **Specific hazards:** Contact with certain metals (aluminium, zinc) releases flammable hydrogen gas. Toxic and irritant fumes/mists may form if heated or in a fire. Do not breathe smoke.

- **Firefighting PPE:** Full protective clothing + self-contained breathing apparatus (SCBA).
- **Flash point:** To be confirmed by laboratory test — ASTM D93 (see Section 9).

6 ACCIDENTAL RELEASE MEASURES

- **Personal precautions:** Full PPE (see Section 8). Evacuate non-essential personnel.
- **Containment:** Dike with inert absorbent (sand, diatomaceous earth). Neutralize with a mild alkali (sodium bicarbonate / baking soda is suitable).
- **Cleanup:** Collect absorbed material in chemical-resistant container. Do not flush to sewer.
- **Environmental precautions:** Prevent entry into drains/watercourses (see Section 12).

7 HANDLING AND STORAGE

- **Handling:** ADD TO WATER, NEVER WATER TO CONCENTRATE. Small increments, stir. Full PPE. Good ventilation.
- **Storage:** Store in the original HDPE container as supplied, tightly closed, in a cool dry ventilated area. Separate from alkaline products, oxidizers, and metals. Store off floor in secondary containment.
- **Incompatibilities:** Bases/alkalines (violent reaction), metals (hydrogen evolution), oxidizers, sodium hypochlorite (chlorine gas).

8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Occupational exposure limits: No exposure limit has been established for the mixture. Component-specific occupational exposure limits are withheld as trade secrets per 29 CFR 1910.1200(i). As a conservative internal control, keep airborne mist below 1 mg/m³ TWA (respirable).

- **Respiratory:** Not normally required with proper ventilation; use acid-mist respirator if mist/fumes form.
- **Hands:** Nitrile or neoprene gloves (NOT latex — degraded by acids).
- **Eyes/Face:** Chemical splash goggles + full face shield. Mandatory when mixing.
- **Body:** Acid-resistant apron; long sleeves; closed-toe footwear.

9 PHYSICAL AND CHEMICAL PROPERTIES

PROPERTY	VALUE
Appearance	Clear liquid
Odor	Mild, characteristic odor
pH	≈ 0.3 (as-sold concentrate)
Boiling point	~100–110°C (aqueous)
Melting point	Not determined (liquid)
Flash point	To be determined — ASTM D93 (Pensky–Martens closed cup), test scheduled
Vapor pressure	Water-like
Density	~1.2 g/mL (approximate)
Solubility	Fully miscible in water
VOC content	Low — not determined

10 STABILITY AND REACTIVITY

- **Stability:** Stable under normal storage/handling.

- **Hazardous polymerization:** Does not occur.
- **Conditions to avoid:** Heat, contact with alkaline materials, contact with metals.
- **Incompatible materials:** Alkalies, oxidizers, hypochlorite, active metals (Al, Zn, Mg) — hydrogen gas release.
- **Hazardous decomposition products:** Toxic and irritant fumes and mists may form in fire. Do not breathe smoke.

11 TOXICOLOGICAL INFORMATION

- **Acute toxicity (mixture):** Harmful if swallowed (Cat 4, H302).
- **Skin corrosion/irritation:** Category 1A — severe burns. Strong acid concentrate.
- **Serious eye damage:** Category 1 — severe, irreversible damage.
- **Skin sensitization:** Category 1 (H317) — contains a dermal sensitizer (identity withheld — trade secret). Primary hazard remains corrosivity; gloves required.
- **Carcinogenicity:** No components listed as carcinogens by IARC/OSHA/NTP at or above reportable levels (identities withheld as trade secrets).
- **Aspiration hazard:** Not classified.
- **Target organs:** Skin, eyes, respiratory tract (mists), GI tract (if ingested).

12 ECOLOGICAL INFORMATION

- **Aquatic toxicity (mixture):** Very toxic to aquatic life with long-lasting effects (H410).
- **Persistence/degradability:** Organic fraction biodegradable; formulation components are diluted and neutralized in the environment.
- **Mobility:** Fully water-miscible; mobile in soil/water.
- **Other adverse effects:** Highly acidic — can lower receiving-water pH.

13 DISPOSAL CONSIDERATIONS

- **Disposal:** Neutralize with a mild alkali (sodium bicarbonate / baking soda is suitable) to pH 6–9, then dispose per federal/state/local regulations. Never pour concentrated product down drains untreated.
- **Container:** Rinse thoroughly (triple rinse); recycle where available.
- **RCRA status:** Manage as corrosive waste (EPA D002) if not neutralized.

14 TRANSPORT INFORMATION

UN number	UN 1760
Proper shipping name	Corrosive liquid, n.o.s.
Transport hazard class	8
Packing group	II (verify per component concentrations at final formulation)
Marine pollutant	Yes
Special provisions	Limited Quantity / Consumer Commodity (ID8000) exceptions apply to small retail packs — verify per package size before shipping

Note: For retail-size consumer bottles, Limited Quantity (LQ) / Consumer Commodity rules permit economical ground shipping. Confirmed at quote time per carton.

15 REGULATORY INFORMATION

- **US Federal:** OSHA Hazard Communication Standard (29 CFR 1910.1200). TSCA — all components listed or exempt; identities withheld as trade secrets.

- **CERCLA/SARA:** Components may be subject to CERCLA reportable-quantity and SARA 313 reporting; identities and thresholds withheld as trade secrets per 29 CFR 1910.1200(i). Release-reporting obligations are tracked internally by ALETH Chemical Co.
- **State:** CA Prop 65 — status under internal review at launch; potential to contain a listed chemical (identity withheld as trade secret). Final determination at label lock.
- **WHMIS 2015 (Canada):** Classified per Hazardous Products Regulations — Corrosive (D1/D2) and skin sensitization. Mutagenicity, carcinogenicity, reproductive and respiratory-sensitization categories assessed per mixture summation — not classified. Label elements per official bilingual requirements at launch.
- **EU REACH:** Not placed on the EU market at this time. SDS formatted per 29 CFR 1910.1200 Appendix D.
- **Trade-secret note:** Specific chemical identities and/or exact concentrations of proprietary components withheld per 29 CFR 1910.1200(i)(1); hazard information fully disclosed.

16 OTHER INFORMATION

- **Prepared by:** ALETH Chemical Co. — formulation & compliance team
- **Date of issue:** October 7, 2026 · **Version 2.1** (supersedes Version 2.0 of September 22, 2026)
- **Revision history:** Version 2.0 (September 22, 2026): composition disclosure reduced to class level under the trade-secret provisions of 29 CFR 1910.1200(i); descriptive and regulatory sections generalized. Hazard profile unchanged — no reclassification. Version 2.1 (October 7, 2026): product identifier aligned to the registered retail name; no change to classification or composition disclosure.
- **Next scheduled review:** September 22, 2027, or upon any formulation or regulatory change.
- **SDS sources:** Component classifications derived from supplier SDS library + UN GHS Rev. 9 mixture classification rules. Supplier and component names intentionally omitted.
- **Disclaimer:** Information provided as-is for hazard communication. User assumes responsibility for safe use under their specific conditions.
